CELL CALCIUM

Cell Calcium (1994) 16, 523–526
© Longman Group Ltd 1994

Subject Index to Volume 16

A

ACTH response (AVP-stimulated) in ovine corticotrophs, effects of a chemically diverse range of calcium channel antagonists on, 47
Aequorin, nuclear targeting of: A new approach for measuring nuclear Ca^{2+} concentration in intact cells, 259
Amino acid deprivation, calreticulin – a stress protein induced in the renal epithelial cell line NBL-1 by, 1
Apoptosis, nuclear calcium transport and the role of calcium in, 279
ATP (extracellular) activates calcium entry and mobilization via P_{2U}-purinoceptors in rat lactotrophs, 227
AVP-stimulated ACTH response in ovine corticotrophs, calcium channel antagonists on, 47

B

Bradykinin-stimulated calcium mobilization in cultured canine tracheal smooth muscle cells, 59

C

Calcium
- and calmodulin dependent protein kinase II, activation of, during stimulation of insulin secretion, 137
- and melatonin production in dissociated trout pineal photoreceptor cells in culture, 37
- and the nucleus: Collected papers and reviews, 237–338
- binding proteins in normal and transformed cells (Meeting Report), 339
- channel antagonists effects on the AVP-stimulated ACTH response in ovine corticotrophs, 47
- channel density (sarcolemmal altered) and Ca^{2+}-pump ATPase activity in tachycardia heart failure, 349
- concentration changes in nucleus and cytosol, relationship between, 239
- concentration, cytosolic free, in the mitogenic stimulation of T lymphocytes by anti-CD3 monoclonal antibodies, 167
- current, evolution of the, during dialysis of isolated bovine chromaffin cells: effect of internal calcium, 357
- entry activated by store depletion in human umbilical vein endothelial cells, 367
- entry and cellular calcium mobilization in *Xenopus* oocytes, independent external, 20
- entry and mobilization, extracellular ATP activates, via P_{2U}-purinoceptors in rat lactotrophs, 227
- entry and release in CHO cells expressing the m3 muscarinic receptor, differential effects of carbachol on, 181
- elevation (cytosolic) in response to Fc receptor cross-linking in undifferentiated and differentiated U937 cells, 29
- handling (intracellular) in isolated ventricular myocytes from cardiomyopathic hamsters (strain BIO 14.6) with congestive heart failure, 500
- in cell division, the role of, 322
- in living cells, a practical guide to the study of (Book Review), 347
- intracellular, erythropoietin modulation of, role for tyrosine phosphorylation, 481
- intracellular, UV laser-scanning confocal microscope for the measurement of, 205
- mobilization, 5-hydroxytryptamine-stimulated, in cultured canine tracheal smooth muscle cells, 194
- mobilization, bradykinin-stimulated, in cultured canine tracheal smooth muscle cells, 59
- nuclear, concentration in intact cells, nuclear targeting of aequorin for measuring, 259
- nuclear, homoeostasis, nuclear phosphoinositide cycle – does it play a role in, 297
- oscillations, membrane potential model with counterions for cytosolic, 9
- pump, characterisation of an intracellular, in *Dictyostelium*, 509
- pump (plasma membrane) in human neutrophils, delayed activation of, 455
- release during nuclear vesicle fusion, a new role for IP3 receptors, 314
- rise in cytoplasmic, induced by monensin in bovine medullary chromaffin cells, 475
- sequestering organelles of *Dictyostelium discoideum*: changes in element content during early development as measured by electron probe X-ray microanalysis, 101

regulation of immediate-early response genes, 331
signal, the initiation of a, in *Xenopus* oocytes, 391
signaling (intracellular) induced by thapsigargin in excitable and inexcitable cells, 467
signals in and around the nucleus in sea urchin eggs, 269
signalling pathways, cautions for the use of imidazole antimycotics econazole and miconazole when studying, 413
spikes (repetitive cytosolic) in mouse pancreatic acinar cells, delay in granular fusion evoked by, 419
stores in insulin-secreting cells: lack of effect of cADP ribose, 71
transients (intracellular) in isolated perfused rat heart: measurement using the fluorescent indicator Fura–2/AM, 87
transients (intracellular) in potentiated contractions induced by multiple extrasystolic beats in isolated perfused rat hearts, 219
transport (nuclear) and the role of calcium in apoptosis, 279
waves cytosolic, propagation of, into the nuclei of hepatocytes, 247
wave propagation, theoretical analysis of, based on inositol (1,4,5)-trisphosphate ($InsP_3$) receptor functional properties, 151
cADP ribose, lack of effect of, in Ca^{2+} stores in insulin-secreting cells, 71
Calmodulin
and calcium dependent protein kinase II, activation of, during stimulation of insulin secretion, 137
and calmodulin-binding proteins in the nucleus, 289
expression in NRK cells activated to proliferate from quiescence, protein kinase C regulates, 446
levels (smooth muscle) in the rat, effect of short and long term streptozotocin diabetes on, 81
Calreticulin – stress protein induced in the renal epithelial cell line NBL-1 by amino acid deprivation, 1
Carbachol, differential effects of, on calcium entry and release in CHO cells expressing the m3 muscarinic receptor, 181
Cardiac muscle (skinned mammalian) measurement of sarcoplasmic reticulum calcium content in, 123
Cardiomyopathic hamsters (strain BIO 14.6) with congestive heart failure, intracellular calcium handling in isolated ventricular myocytes from, 500
Cell division, the role of calcium in, 322
CHO cells expressing the m3 muscarinic receptor, differential effects of carbachol on calcium entry and release in, 181
Chondrocytes (growth plate), activation of phosphoinositide metabolism by parathyroid hormone in, 112
Chromaffin (bovine) cells
evolution of the Ca^{2+} current during dialysis of: effect of internal calcium, 357
lanthanum can be transported by the sodium-calcium exchange pathway and directly triggers catecholamine release from, 377
medullary, rise in cytoplasmic Ca^{2+} induced by monensin, 475
Confocal microscope (UV laser-scanning) for the measurement of intracellular Ca^{2+}, 205
Corticotrophs (ovine), effects of a chemically diverse range of calcium channel antagonists on the AVP-stimulated ACTH response in, 47
Counterions, membrane potential model with, for cytosolic calcium oscillations, 9

D

Diabetes (streptozotocin induced), effect of short and long term, on smooth muscle calmodulin levels in the rat, 81
Dictyostelium discoideum, calcium-sequestering organelles of: changes in element content during early development as measured by electron probe X-ray microanalysis, 101
Dictyostelium, characterisation of an intracellular Ca^{2+} pump in 509

E

Econazole and miconazole reduce agonist-evoked protein-tyrosine phosphorylation and evoke membrane depolarisation in human platelets, 413
Electron probe X-ray microanalysis, calcium-sequestering organelles of *Dictyostelium discoideum*: changes in element content during early development as measured by, 101
Endothelial (pulmonary artery) cells, reduced PO_2 alters the behavior of Fura–2 and Indo–1 in, 404
Endothelial cells (human umbilical vein), calcium entry activated by store depletion in, 367
Erythropoietin modulation of intracellular calcium: a role for tyrosine phosphorylation, 481
Excitable and inexcitable cells, intracellular calcium signaling induced by thapsigargin in, 467

F

Fc receptor cross-linking in undifferentiated and differentiated U937 cells, cytosolic calcium elevation in response to, 29
Fura–2 and Indo–1, reduced PO_2 alters the behavior of, in bovine pulmonary artery endothelial cells, 404
Fura–2/AM for measurement of intracellular Ca^{2+} transients in isolated perfused rat heart, 87

G

Genes (immediate-early response), calcium regulation of, 331
Granular fusion, delay in, evoked by repetitive cytosolic Ca^{2+} spikes in mouse pancreatic acinar cells, 419

H

Heart failure (congestive), calcium (intracellular) handling in isolated ventricular myocytes from cardiomyopathic hamsters (strain BIO 14.6) with, 500
Heart failure (tachycardia), altered sarcolemmal calcium channel density and Ca^{2+}-pump ATPase activity in, 349
Heart, isolated perfused rat
intracellular Ca^{2+} transients in: measurement using the fluorescent indicator Fura–2/AM, 87
intracellular calcium transients in potentiated contractions induced by multiple extrasystolic beats in, 219
Hepatocytes nuclei, propagation of cytosolic calcium waves into, 247
High molecular weight (IgG) proteins, introduction of, into receptor coupled permeabilized smooth muscle, 431
5-Hydroxytryptamine (5HT)-stimulated calcium mobilization in cultured canine tracheal smooth muscle cells, 194

I

Imidazole antimycotics econazole and miconazole reduce agonist-evoked protein-tyrosine phosphorylation and evoke membrane depolarisation in human platelets: cautions for their use in studying Ca^{2+} signalling pathways, 413
Indo–1 and Fura–2, reduced PO_2 alters the behavior of, in bovine pulmonary artery endothelial cells, 404
Inositol (1,4,5)-trisphosphate ($InsP_3$) receptor functional properties, theoretical analysis of calcium wave propagation based on, 151
Inositol 1,4,5-trisphosphate and inositol 1,3,4,5-tetrakisphosphate receptors (nuclear), 301
Insulin secretion, stimulation of, activation of calcium and calmodulin dependent protein kinase II during, 137
Insulin-secreting cells, Ca^{2+} stores in: lack of effect of cADP ribose, 71
IP_3 receptors, new role for: Ca^{2+} release during nuclear vesicle fusion, 314

L

Lactotrophs (rat), extracellular ATP activates calcium entry and mobilization via P_{2U}-purinoceptors in rat lactotrophs, 227
Lanthanum can be transported by the sodium-calcium exchange pathway and directly triggers catecholamine release from bovine chromaffin cells, 377

M

Melatonin and calcium production in dissociated trout pineal photoreceptor cells in culture, 37
Membrane potential model with counterions for cytosolic calcium oscillations, 9
Miconazole and econazole reduce agonist-evoked protein-tyrosine phosphorylation and evoke membrane depolarisation in human platelets, 413
Mitogenic stimulation of T lymphocytes by anti-CD3 monoclonal antibodies, cytosolic free calcium concentration in the, 167
Model, membrane potential, with counterions for cytosolic calcium oscillations, 9
Monensin, rise in cytoplasmic Ca^{2+} induced by, in bovine medullary chromaffin cells, 475
Monoclonal antibodies (anti-CD3), cytosolic free calcium concentration in the mitogenic stimulation of T lymphocytes by, 167
Muscarinic (m3) receptor, differential effects of carbachol on calcium entry and release in CHO cells expressing the, 181
Muscarinic stimulation in the human tumour line TE671/RD, rapid synchrony of nuclear and cytosolic Ca^{2+} signals, 491

N

Neutrophils (human), delayed activation of plasma membrane Ca^{2+} pump in, 455
NRK cells activated to proliferate from quiescence, protein kinase C regulates calmodulin expression in, 446
Nuclear
  and cytosolic Ca^{2+} signals, rapid synchrony of, activated by muscarinic stimulation in the human tumour line TE671/RD, 491
  Ca^{2+} homoeostasis, nuclear phosphoinositide cycle – does it play a role in? 297
  calcium transport and the role of calcium in apoptosis, 279
  inositol 1,4,5-trisphosphate and inositol 1,3,4,5-tetrakisphosphate receptors, 301, 522 (Erratum)
  phosphoinositide cycle – does it play a role in nuclear Ca^{2+} homoeostasis? 297
  targeting of aequorin: A new approach for measuring nuclear Ca^{2+} concentration in intact cells, 259
  vesicle fusion, Ca^{2+} release during, a new role for IP_3 receptors, 314
Nucleus, calmodulin and calmodulin-binding proteins in the, 289

P

P_{2U}-purinoceptors in rat lactotrophs, extracellular ATP activates calcium entry and mobilization via, 227
Pancreatic acinar (mouse) cells, delay in granular fusion evoked by repetitive cytosolic Ca^{2+} spikes in, 419
Parathyroid hormone, activation of phosphoinositide metabolism by, in growth plate chondrocytes, 112
Phosphoinositide (nuclear) cycle – does it play a role in nuclear Ca^{2+} homoeostasis? 297
Phosphoinositide metabolism activation by parathyroid hormone in growth plate chondrocytes, 112
Photoreceptor (pineal) cells in culture: calcium and melatonin production in, 37
Pineal photoreceptor cells (trout) in culture, calcium and melatonin production in, 37
Platelets (human), imidazole antimycotics econazole and miconazole reduce agonist-evoked protein-tyrosine phosphorylation and evoke membrane depolarisation in, 413
PO_2 (reduced) alters the behavior of Fura–2 and Indo–1 in bovine pulmonary artery endothelial cells, 404
Propagation of cytosolic calcium waves into the nuclei of hepatocytes, 247
Protein kinase C regulates calmodulin expression in NRK cells activated to proliferate from quiescence, 446
Protein kinase II activation of calcium and calmodulin dependent, during insulin secretion, 137

R

Receptor coupled permeabilized smooth muscle, introduction of high molecular weight (IgG) proteins, 431
Renal epithelial cell line NBL-1 by amino acid deprivation, calreticulin – a stress protein induced in the, 1

S

Sarcolemmal calcium channel density (altered) and Ca^{2+}-pump ATPase activity in tachycardia heart failure, 349
Sarcoplasmic reticulum calcium content in skinned mammalian cardiac muscle, measurement of, 123
Sea urchin eggs, calcium signals in and around the nucleus in, 269
Sodium-calcium exchange pathway, lanthanum can be transported by the, and directly triggers catecholamine release from bovine chromaffin cells, 377
Streptozotocin diabetes, effect of short and long term, on smooth muscle calmodulin levels in the rat, 81
Stress protein induced in the renal epithelial cell line NBL-1 by amino acid deprivation – calreticulin, 1

T

T lymphocytes by anti-CD3 monoclonal antibodies, cytosolic free calcium concentration in the mitogenic stimulation of, 167

Tachycardia heart failure, altered sarcolemmal calcium channel density and Ca^{2+}-pump ATPase activity in, 349

Thapsigargin in excitable and inexcitable cells, intracellular calcium signaling induced by, 467

Theoretical analysis of calcium wave propagation based on inositol (1,4,5)-trisphosphate ($InsP_3$) receptor functional properties, 151

Tracheal smooth muscle cells (cultured canine)
- bradykinin-stimulated calcium mobilization in, 59
- 5-hydroxytryptamine-stimulated calcium mobilization in, 194

Transformed and normal cells, calcium-binding proteins in (Meeting Report), 339

Tumour (human) line TE671/RD, rapid synchrony of nuclear and cytosolic Ca^{2+} signals activated by muscarinic stimulation in, 491

Tyrosine phosphorylation, erythropoietin modulation of intracellular calcium: a role for, 481

U

UV laser-scanning confocal microscope for the measurement of intracellular Ca^{2+}, 205

X

Xenopus oocytes
- independent external calcium entry and cellular calcium mobilization in, 20
- the initiation of a calcium signal in, 391
